Summary

Analytical and results-oriented Data Analyst with 1.2 years of experience at Deloitte, skilled in SQL, Power BI, and Python for transforming complex datasets into actionable business insights. Proven track record of developing interactive dashboards, optimizing reporting processes, and improving operational efficiency for US-based clients. Adept at KPI development, data validation, and stakeholder communication to drive data-driven decision-making.

Skills

- Data Analysis & Business Intelligence
- SQL Query Writing & Optimization
- Power BI Dashboard Development
- Python (Pandas, NumPy)
- Data Cleaning & Transformation
- KPI Development & Reporting
- Database Management (MySQL, MongoDB)
- Power Query Editor, ETL Process
- Advanced Excel (Pivot Tables, Power Query), Github
- ChatGPT, Google Gemini, Claude AI
- Prompt Engineering, AI-assisted Data Analysis
- Stakeholder Communication

Experience

- 01/2025- Current
Deloitte
 - **Data Analyst**
 - Developed interactive Power BI dashboards for US-based clients to monitor KPIs, revenue performance, and operational metrics.
 - Wrote optimized SQL queries to extract and analyze large datasets (500K+ records).
 - Automated recurring reporting processes using Python and Excel, reducing manual reporting time by 35%.
 - Conducted data validation and cleansing to ensure 99% data accuracy.
 - Partnered with cross-functional teams to gather requirements and deliver data-driven insights.
 - Improved database query performance by 25% through indexing and restructuring.

Projects

Project 1. Supply Chain Performance & Inventory Optimization Dashboard

Client: BlueWave Logistics Inc.

Duration: Ongoing

Responsibilities:

- Designed and developed a Power BI dashboard to track inventory turnover, warehouse efficiency, and shipment delays.
- Extracted operational data using SQL from MySQL databases (600K+ records).
- Performed data transformation and preprocessing using Python (Pandas) for accurate KPI generation.
- Built key metrics including inventory turnover ratio, order fulfillment rate, and on-time delivery %.
- Identified slow-moving inventory, helping reduce excess stock by 15%.
- Automated weekly operational performance reports for management decision-making.

Project 2. Sales Performance & Customer Insights Dashboard

Client: Horizon Retail Corp.

Duration: 6 Months

Responsibilities:

- Developed a Power BI dashboard to visualize sales performance, customer behavior, and regional trends.
- Extracted and processed sales data from MySQL and MongoDB databases (400K+ records).
- Created KPIs including monthly revenue, customer retention rate, and product category performance.
- Conducted segmentation analysis to identify high-value customers and optimize marketing campaigns.
- Automated daily sales reports, reducing manual effort by 40%.
- Delivered actionable insights to support sales strategy and inventory planning.

Education

● Lonere

B.Tech in Electronics & Computer Science

Dr. Babasaheb Ambedkar Technological University
